

AAYUSH KUMAR JHA

M.Sc AI & Data Science Student | AI/ML Enthusiast

Hisar, Haryana, India · +91 8797959096 · jhaayush40@gmail.com · [LinkedIn](#) · [GitHub](#) · [Kaggle](#)

PROFESSIONAL SUMMARY

Passionate AI/ML Enthusiast and current Master's student in Computer Science (specializing in AI and Data Science). I love learning new technologies and have hands-on experience building and launching real projects, like a web-based disease prediction app with 85%+ accuracy and a 4× image upscaling tool using GANs. I am eager to bring my coding skills and strong motivation to an entry-level AI/ML role or internship.

EXPERIENCE

Django Backend Intern | [SUKTAS Inc. Pvt. Ltd.](#)

2023 – 2024

Nepal

- ▶ Built and maintained RESTful Django web applications serving live user traffic, contributing features across the full request-response lifecycle.
- ▶ Collaborated with cross-functional teams (design, QA, product) to deliver project milestones on time.
- ▶ Wrote clean, documented code; participated in code reviews and reduced bug backlog by triaging and fixing existing issues.

PROJECTS

HealthCare Hub — Disease Prediction Platform — *Python · Django · Random Forest · PostgreSQL · Real-time Chat* [\[GitHub\]](#)

- ▶ Deployed a full-stack web application integrating a Random Forest classifier with 85%+ accuracy across 5 common diseases, processing real user health inputs and returning live disease probability scores.
- ▶ Built patient–doctor real-time communication module using Django Channels (WebSocket), enabling live consultation within the platform.
- ▶ Integrated user feedback and rating system to track model performance post-deployment, enabling data-driven model iteration.
- ▶ Managed complete ML pipeline: data preprocessing, feature engineering, model serialization (joblib), and API integration into Django views.

Image Super-Resolution via SRGAN — *Python · TensorFlow · OpenCV · GANs · DIV2K Dataset* [\[GitHub\]](#)

- ▶ Implemented a full SRGAN (Super-Resolution GAN) pipeline from scratch achieving 4× upscaling on the DIV2K benchmark dataset.
- ▶ Developed a deep learning-based image enhancement system using SRGAN to generate high-resolution images from low-resolution inputs.
- ▶ Trained on the DIV2K dataset and deployed a Streamlit web application for real-time 4× image upscaling and visualization.

JARVIS — NLP Voice Assistant — *Python · TensorFlow · NLTK · SpeechRecognition · pyttsx3* [\[GitHub\]](#)

- ▶ Built an intent classification model using TensorFlow with 92%+ training accuracy across 15+ custom command categories.
- ▶ Integrated real-time speech-to-text (Google Speech API) and text-to-speech for fully hands-free operation.
- ▶ Enabled system-level automation: app launching, web search, weather lookup, and file management via natural language commands.

Market Basket Analysis — Python · Apriori · mlxtend · Matplotlib · Seaborn [\[GitHub\]](#)

- Applied Apriori algorithm to a 10,000+ transaction retail dataset, surfacing top association rules with support > 2% and confidence > 60%.
- Identified 5 high-value product bundles with lift > 2.5×, directly translatable to cross-sell recommendations.
- Visualized frequent itemset networks and heatmaps to communicate insights to non-technical stakeholders.

TECHNICAL SKILLS

Languages: Python, R, JavaScript, C, C++

ML / DL: TensorFlow (basics), OpenCV, Keras, PyTorch, Scikit-learn, NLTK, NumPy, Pandas

Data Analytics: Exploratory Data Analysis(EDA), Data Cleaning, Feature Engineering, Hypothesis Testing

Data & Viz: PowerBI, Matplotlib, Seaborn, Jupyter Notebook

Web & Backend: Django, Django REST Framework, HTML, CSS, PostgreSQL

Tools: Excel, Git, GitHub, VS Code, Google Colab

Concepts: CNNs, GANs, NLP, Random Forest, Association Rules, REST APIs, ML Deployment

EDUCATION

M.Sc. Computer Science (AI & Data Science) | [GJUS&T — Guru Jambheshwar University](#) Aug 2025

– Present

Hisar, Haryana, India

- Specialization in Artificial Intelligence and Data Science; coursework covers deep learning, statistical modeling, and large-scale data engineering.

B.Sc. Computer Science & Information Technology (4-Year) | [Tribhuvan University — Birat Kshitiz College](#) Nov 2019 – Nov 2024

Morang, Nepal

- Graduated with 69.38% / 7.3 CGPA. Final-year project: HealthCare Hub disease prediction platform (capstone, deployed).

Intermediate (Science) | [Shikshadeep Higher Secondary School](#)

July 2017 – May 2019

Morang, Nepal

- 3.24 / 4.0 GPA. Core subjects: Physics, Mathematics, Computer Science.

CERTIFICATIONS & TRAINING

Diploma in Data Science & Machine Learning — Vrit Technologies, Kathmandu, Nepal (Oct – Dec 2023)

Covered supervised/unsupervised learning, data wrangling, model evaluation, and end-to-end project workflows.
